

DECORATIVE ■■■ ARCHITECTURAL ARBORS

AUER-JORDAN'S DECORATIVE ARCHITECTURAL ARBORS

add picturesque architectural elements to garages, windows and doorways. The arbors incorporate the unique brackets and lathing which provide individuality to homes.

The finely crafted arbors are made of kiln dried *Port Orford cedar*, the strongest and most durable of all cedars. The wood may be left natural, stained or painted.

Components attach to any structure with standard lag bolts or deck screws of the appropriate length. *(Mounting hardware is not included.)*
